

PetroQuip Liner Hanger Packer and PBR

Packer w/ PBR

The **PetroQuip Liner Hanger Packer** is set by hydraulic pressure within the running string with no rotation or reciprocation required. The Liner Hanger Packer provide a means of anchoring and hanging a liner in existing casing. Once the Liner Hanger Packer is set, 1/4 turn at the liner hanger and set down weight releases the running tool.

Features & Benefits:

- Hydraulic activation eliminates the need for drill string manipulation
- Developed for highly deviated wells
- Available in a wide variety of metals and elastomers
- One piece body design
