

PetroQuip Tubing Anchor Catcher

The **PetroQuip Anchor-Catcher** features quarter turn set and release that can be landed in tension, compression, or in a neutral position. It shares the same robust slip system featured on the PetroQuip 1X Packer. The PetroQuip Anchor-Catcher also includes an adjustable safety straight pull shear release. Special cone design maintains slip engagement through load reciprocation, preventing the anchor from working loose.

The compact design is ideally suited for dog legs and highly deviated wells. The tool is available with carbide slips for hard casing

Features and Benefits

- One-quarter turn rotation is required to set and release
- Adjustable straight pull safety release
- Short overall length is suitable for highly deviated wells
- Can be set shallow by pulling tension after initial slip engagement
- Can be left in tension, compression or a neutral position

Available in 5-1/2" x 2-7/8" for 23-26#, 20-23#,
or 15.5-17# sizes
